

Recommendation Update Form

This response is in reference to recommendation #24-6 / Area Command SW

Responsible SME: Anthony Montano

Date Sent:

09/13/24

Date Due:

09/23/24

*Please provide response to highlighted portions.

APD UPDATE:As of this date, there are no immediate plans to increase shotspotter coverage in the SW Area Command. This is primarily due to a lack of a recurring funding source. Currently there is 7.03 square miles of coverage for the SW Area Command with a price of approximately \$525,000 annually. The SW Area Command has the largest coverage area to date in comparison to the other 6 Area Commands.

As of last week, the SW Area Command coverage encompassed approximately 24% of the city. In addition, the SW Area Command has approximately 80% of its residential areas covered, which is also a larger coverage area in comparison to the other 6 Area commands.

Recommendation Status: Approved Denied

*If denied please give reasoning: There is currently no funding source available to increase the coverage in the SW Area Command. For every square mile of coverage, the annual cost to APD would be \$75,000. We are currently working on a solution to address concerns of the SW Area Command, its citizens, and Councilor Pena

Chief made aware of recommendation: Yes No
