Title for Recommendation

Window Breaking Tool for Patrol Officers

Recommendation

I would like to recommend that all APD Patrol officers be given a simple tool, after the academy to break automobile windows at car accidents, as not having one might lead to an unfortunate accident.

Reason for Recommendation/Supporting Research

I was on a ride-along with officers a few years ago, and we went to investigate a car accident. The driver was stuck in the car, and the Officers being first responders, had to literally look around on the street, then the sidewalk for a rock. They found the rock but it took a few minutes. A small tool used specifically to break a window would make this very simple.
