Application for a

# **Fugitive Dust Control Programmatic Permit**

for Routine Surface Disturbance within Bernalillo County
Albuquerque - Bernalillo County Air Quality Control Board Regulation 20.11.20 NMAC

This application becomes a permit once signed by Air Quality Program

Effective Date of this Application Form: 01/10/2021

Submittal Date: Received by: Permit #: A Programmatic Permit is a fugitive dust control permit, valid for up to five years, issued to a Permittee that performs routine maintenance or routine active operations on land or at facilities of 3/4 of an acre or more, which does not include full depth reconstruction of a roadway or substantial removal & replacement of a manmade facility. This application shall include a Fugitive Dust Control Plan (Part B or attached alternative Plan) that may utilize reasonably available control measures to mitigate fugitive dust to meet objectives of 20.11.20 NMAC - Fugitive Dust Control. PART A – FACILITY INFORMATION AND GENERAL ACTIVITIES If permittee wishes to include multiple facility locations under same permit, submit required information for each individual site by submitting additional copies of Parts A, B, C & D, as necessary AN 8 ½" X 11" OR LARGER SITE MAP MUST ACCOMPANY APPLICATION FOR EACH FACILITY LOCATION 1. Fugitive Dust Facility/Site Name: 2. Street Address of Facility (if available): Zip Code: 3. Nearest Major Cross Streets or Intersection to Facility: 4. Total Acres of Facility: \_\_\_\_\_ 5. Total Acres of Facility Subject to Routine Maintenance/Active Operations: 6. Total Miles of Roads/Easements for Facility Subject to Routine Maintenance/Active Operations: 7. Total Miles of Roads/Easements for Facility Converted to Acres: 8. Description of Facility's Operation(s): 9. Describe Type of Activities at Facility That May Generate Fugitive Dust:

<ul> <li>LANDSCAPING</li> <li>Reseeding using native grasses as specified in 20.11.20.24 NMAC – NATIVE GRASS SEEDING AND MULCH SPECIFICATIONS;</li> <li>Xeriscaping;</li> <li>Mulching &amp; crimping of straw or hay as specified in 20.11.20.24 NMAC;</li> </ul>	
<ul> <li>TRAFFIC</li> <li>Using traffic controls, including decreased speed limits with appropriate enforcement; other traffic calming methods, vehicle access restrict &amp; controls; road closures or barricades; off-road vehicle access controls &amp; closures;</li> <li>Cleaning up spillage &amp; track out as necessary to prevent particulates from being pulverized &amp; entrained into atmosphere;</li> <li>Performing regularly scheduled vacuum street cleaning or wet sweeping;</li> <li>Using properly secured tarps or cargo covering that covers entire surface area of load;</li> <li>Installing fencing to limit vehicle access to property</li> </ul>	tion
<ul> <li>WINDBREAKS</li> <li>Installing upwind windbreaks, including fabric fences with bottom of fence sufficiently anchored to ground to prevent material from blow underneath fence; all windbreaks &amp; fabric fences should be maintained in an upright &amp; functional condition at all times; all accumul material on windward side of windbreak should be periodically removed to prevent failure of windbreak;</li> <li>Installing permanent perimeter &amp; interior walls;</li> <li>For Salvage Yards - using salvaged vehicles arranged in rows with minimum spacing between vehicles;</li> <li>For Construction or Storage Yards - using construction materials, equipment, trailers, buildings or structures to create a windbreak;</li> <li>Using dense hedges, shrubbery or trees;</li> <li>Using sand fences, board rail fences, or similar fences that have openings on approximately 50% of surface;</li> <li>Natural barriers</li> </ul>	
<ul> <li>WATERING</li> <li>Using wet suppression;</li> <li>Watering site at beginning &amp;/or end of each day sufficient to stabilize area;</li> <li>Using dust suppressants applied in amounts, rates, &amp; frequencies &amp; maintained as recommended by manufacturer (submit manufacturer's with application)</li> </ul>	data
<ul> <li>PavinG</li> <li>Paving using well-maintained recycled asphalt, asphaltic concrete, concrete, or petroleum products legal for such use;</li> <li>Using paved or gravel entry/exit aprons with devices, such as steel grates, capable of knocking mud &amp; bulk material off vehicle tires;</li> <li>Surfacing with gravel or other mulch material of a size &amp; density sufficient to prevent surface material from becoming airborne</li> </ul>	
Use <u>underlined headings</u> below when filling in control measures in column D of Part D Table. These measures may reduce release of fugitive from facility or reduce amount of acreage/miles requiring control if applied as permanent stabilization (i.e.: maintained pavement)	dus
<b>B1.</b> Permittee shall include in permit application <u>one or more</u> applicable reasonably available control type measures listed below (abbreviated <u>or one or more other</u> (alternative) fugitive dust control measures, including measures taken to comply with any other statute or regulation that w also effectively control fugitive dust during routine active operations & maintenance & inactive operations. For an expanded list of control measures, refer to 20.11.20.23 NMAC – Fugitive Dust Control.	oul
If permittee chooses to submit, as an attachment to application, an alternative Fugitive Dust Control Plan in lieu of using any reasonably avail control measures given below or from 20.11.20.23 NMAC – Fugitive Dust Control, the alternative plan (i.e. storm water pollution prevention purposed include detailed information that addresses: 1) reasonably available control measures to mitigate release of fugitive dust from routine accordance; & 2) action(s) to be taken to mitigate property damage (refer to Part B2 below). If submitting an alternative permittee must still complete Parts A, C, D & E of application.	plan ctiv

10. Provide name of individual to be notified of a High Wind Event who will be responsible to ensure High Wind Event control measures are

"Permittee" is required to comply with Part B, Fugitive Dust Control Plan (plan), detailing reasonably available control measures to be used to

Title: Email Address:

started (see Part B for description):

PART B – FUGITIVE DUST CONTROL PLAN

mitigate release of fugitive dust from routine active operations & maintenance.

Name: \_\_

<b>B2</b> . Summarize, in detail, how Reasonably Available Control Measures currently in place will be used to limit or prevent release of Fugitive Dust from routine active operations &/or maintenance at facility (i.e. credit can be taken for: existing trees or shrubbery along at least 50% of perimeter of facility as a windbreak; salvaged vehicles, materials, or equipment at a salvage yard that forms an effective windbreak; or existing fencing that prevents vehicle access to property as a traffic control). Describe height, length, locations, types, amounts, etc. for all methods to be used as control measures. As a general rule, Department will allow credit for windbreaks for a lateral distance equal to 10 times height of windbreak. (I.e. a 6-foot high windbreak will be credited with reducing dust emissions for a distance of 60 feet from fence:
Active Operations:
Inactive Operations:
<b>B3</b> . Describe in detail the additional fugitive dust control <b>Contingency Measures</b> that will be used at this site if the Reasonably Available Control Measures chosen in Part B2 are determined by the department to be insufficient to provide adequate Fugitive Dust Control during Active and Inactive Operations:
Active Operations:
Inactive Operations:
PART C – HIGH WIND EVENT
When a <u>High Wind Event</u> is announced by Department, <u>ALL</u> Active Operations capable of producing fugitive dust MUST cease; however, the site must continue using reasonably available control measures & implement High Wind Event measures. A High Wind Event is a condition announced by Department of wind speeds of approximately 30 miles per hour that, when accompanied by dry soil conditions, is likely to result in widespread reduced visibility due to blowing fugitive dust & may result in elevated atmospheric particulate levels.
C1. Describe in detail what High Wind Event fugitive dust control measures will be used at this facility:
C2. Describe action(s) to be taken to mitigate claims of property damage by fugitive dust generated at/from this facility:

# PART D - SOURCE CLASSIFICATION & FEE TABLE

A	В	С	D	E
Source Classification (See Definitions Below)	Acres, Rounded to Nearest Whole Number, to be Controlled for Each Source Classification (Convert Miles to Acres)	Emission Control Factor Multiplier (20.11.2.15 G. NMAC)	General Description of Reasonably Available Control Measure(s) Currently in Place or to be Used to Maintain Acreage for Each Source Classification (Refer to Part B1 for Reasonably Available Control Measures) (I.e. Traffic, Windbreaks, etc.)	Total Fee Per Classification [Column B Times (x) Column C]
LOW IMPACT PE-1901		.1		
MODERATE IMPACT PE-1902		.5		
HIGH IMPACT PE-1903		.9		
			Sum of Column E	
			PER ACRE FEE (BASED ON 20.11.20.2.G. NMAC)	x \$150.00
			ANTICIPATED ANNUAL PERMIT FEE	\$

## ABBREVIATED DEFINITIONS OF SOURCE CLASSIFICATIONS

NO IMPACT - active & inactive disturbed surface areas that produce virtually no fugitive dust. Such land surfaces are exempt from fugitive dust control regulation & requirements to pay fees

**LOW IMPACT** - active & inactive disturbed surface areas that are approximately 90% controlled

MODERATE IMPACT - active & inactive disturbed surface areas that are approximately 50% controlled

HIGH IMPACT - active & inactive disturbed surface areas that are approximately 10% controlled

Upon receipt of application, Department will review & verify information submitted. Once Department has determined application is complete, Department will sign application & return a completed copy to permittee as official permit. Subsequently, an invoice will be sent to permittee for initial payment of permit fee. Each year thereafter, Department will send an invoice for annual fees due. Application may be sent by mail to address at top of page 1 or may be hand-delivered to same address between hours of 7:00am - 4:30pm, Monday - Friday.

### PART E-SIGNATURE AUTHORITY OF PERMITTEE

A "permittee" is a person, owner or operator & all legal heirs, successors, & assigns who has applied for & obtained a Fugitive Dust Control Permit approved by Department. "Permittee" agrees to take all actions required by Fugitive Dust Control Permit issued by Department to prevent a violation of 20.11.20 NMAC – Fugitive Dust Control, including stopping active operations, if necessary. "Permittee" is responsible for complying with Fugitive Dust Control Permit, Fugitive Dust Control. Failure to comply shall be a violation of 20.11.20 NMAC – Fugitive Dust Control.

**By signing below**, applicant certifies that information provided in application for a Fugitive Dust Control Programmatic Permit is true, accurate & complete, & applicant agrees to be "permittee".

Permittee shall make permit available & explain requirements of permit to appropriate employees, agents, contractors, & any other person involved in active Operations or Maintenance at facility to assist in maintaining compliance with 20.11.20 – Fugitive Dust Control.

Permittee is responsible for maintaining control measures that prevent or abate unreasonable interference with public welfare, visibility & reasonable use of property.

Permittee must initial bottom right corner of all pages to ensure that all application information provided has been reviewed.

[One Set of Signature Pages is Adequate for Multiple Facility (Site) Locations to be Permitted Under Same Permittee & Owner]

### PART F – FACILITY OWNER INFORMATION

If Permittee fails to comply with provisions of 20.11.20 NMAC – Fugitive Dust Control, Owner, if different from Permittee, shall be responsible for complying with Permit. If permittee fails to take all required actions to prevent a violation of 20.11.20 NMAC – Fugitive Dust Control, Owner shall be responsible to take all actions required to prevent or satisfactorily resolve a violation of 20.11.20 NMAC – Fugitive Dust Control, including stopping all active operations, if necessary. To mitigate fugitive dust, all Inactive Disturbed Surface Areas must be stabilized & maintained in stable condition by Owner, Permittee OR Person responsible for maintenance of facility. Failure to comply shall be a violation of 20.11.20 NMAC – Fugitive Dust Control.
