

Blockwise - Quarterly Community Benchmark

The results below show how your scores compare to the US as a whole and to communities like it (the "cohort"). These cohorts were created by using U.S. Census data to statistically group communities together based on variables such as population size, geography, population density, and demographics. Each quarter, thousands of residents from hundreds of communities across the United States participated in Zencity's National Benchmark Survey for Blockwise. Data from this survey were scored (as outlined in the [Survey Methodology section](#)) and combined into one national benchmark and one cohort benchmark, which reflects scores for communities like yours.
