

Introduction to Basics of Computer Use

Learn how to turn on and log in to your computer, the basic components of a computer, how to navigate browsers and introduction to passwords.

Searching and Learning

Use the internet to answer all your questions, and learn how to search like a pro. The DiverseIT staff will show you search tricks and tips so you can get the best information from the world wide web.

Online Safety

Find out how to protect yourself while using the internet, including how to spot scams, phishing emails, and fraud. This will help you keep your computer virus-free and keep your personal information safe.

Meet G Suite - Gmail, GMeet, GDrive

Learn to use the free Google tools of G Suite to write emails, organize documents, and create video gatherings using GMeet (video conferencing).

Presentations offered via Zoom;
Group size is limited
